DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statement (IDS) received on January 9, 2004 has been considered by the Examiner and the initialed copy (one copy) of the IDS is attached with this correspondence.

Priority

2. Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a translation of the foreign application should be submitted under 37 CFR 1.55 in reply to this action. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

3. Applicant also claims priority based on the PCT application number PCT/FI02/00381, however the PCT application is not received by the office.

Oath/Declaration

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
Reference made to US patent application No. 10/400,545 in the Oath and Declaration should be amended to read as---10/700,545---.

Drawings

5. The drawings are objected to because element "CME" in figures 5A and 5B is not properly labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. Applicant is reminded to amend the specification once an amendment to the drawing is made.

Specification

7. The abstract of the disclosure is objected to because the reference made to figure 5B in the abstract of the disclosure should be deleted. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed subject invention is not limited to practical application. Viewed as a whole, the claimed invention is merely sampling, selecting the samples, forming of statistical function, dividing the samples, and repeating the steps. It does not impart any function to the "blindly extracting a broadband signal from the narrowband signal" recited in the preamble.

It should be noted that the preamble of the claim is not given weight unless it is reflected in the body of the claim.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 5,671,247 and 6,816,539 issued to Souissi et al. and Rog disclose a receiver having means for suppressing narrowband signal from the received broadband signal.
